(HAN-CAN2)  
JFK Building  
Boston, MA 02203

Dear Alan:

On behalf of the Potentially Responsible Parties for the New Bedford Harbor case, I request that we receive copies of the source code and worksheets utilized to generate the estimates of carcinogenic and noncarcinogenic risk for PCB, lead, copper, and cadmium, as well as any other compounds available for the Draft Final Baseline Public Health Risk Assessment - New Bedford Harbor Feasibility Study, August 1989, as produced by EBASCO Services. Hard copy or disk would be acceptable. Please identify the spreadsheet program utilized and version of that program.

I appreciate your processing this request. If you have any questions relative to what we are requesting, please give me a call.

Very truly yours,

  
Richard J. Hughto, Ph.D., P.E.  
Vice President

C: Joint Defense Group
